

IT SOLUTIONS & DIGITAL AGENCY

We build the **digital backbone** of growing businesses.

Websites, custom software, and AI-powered systems — designed and engineered for businesses that have outgrown generic templates.

Web & App Development
Custom-built, not templated

CRM & Software Systems
Tailored to your workflow

AI / ML Integration
Practical, production-ready

ABOUT GLAD STUDIO

A focused team, built for serious work.

Glad Studio is a four-person founding team building web, mobile, and AI/ML products for businesses that need more than a basic template. We work closely with each client — from manufacturers and B2B suppliers to travel agencies and service businesses — to design and build digital systems that actually fit how they operate. Every project is built from scratch around the client's brand, processes, and goals.

WHAT WE DO

Four ways we help you grow.

01

Website Design & Development

Custom, fast, mobile-first websites — built to convert visitors into enquiries, not just look good. No generic templates.

02

Custom CRM & Business Software

Lead tracking, client management, and internal tools built around your actual workflow — not adapted to someone else's.

03

Mobile App Development

iOS and Android apps for customer-facing or internal use, built with modern frameworks for speed and reliability.

04

AI & ML Integration

Practical AI features — chatbots, recommendation systems, automation — integrated where they create real value.

HOW WE WORK

A simple, transparent process.

1

Understand Your Business

We start with a conversation—not a template pitch. We learn what you actually need before proposing anything.

2

Design & Prototype

We share a working preview early, so you can see and approve direction before full development begins.

3

Build & Iterate

Development happens in clear stages with your sign-off at each step — no surprises at the end.

4

Launch & Support

We don't disappear after launch. Ongoing maintenance, updates, and support keep your system running.

WHY BUSINESSES CHOOSE US

Built local. Built to last.

Local team, easy to reach, easy to meet in person

Transparent pricing with no hidden costs

Custom-built systems, not recycled templates

Ongoing support after launch, not a one-time job

Modern tech stack used by leading global products

Fast turnaround without compromising on quality

Let's build something **worth showing off.**

Whether it's a website, a custom CRM, or a full digital system—tell us what you're trying to solve, and we'll show you what's possible.
